SECTION I. BACKGROUND, OVERVIEW, AND GOALS

A. Background

83rd Avenue has been identified by the City of Greeley, Weld County, Town of Milliken, City of Evans and the North Front Range MPO as an important north/south arterial roadway. The NFRMPO Traffic Model projects that it will carry significant traffic volume by 2045. Development in the area has spurred the City to look ahead at the future capacity and multi-modal needs along this corridor, specifically between and including the 10th St and 12th St intersections. The City has funding allocated for construction in 2024, with a portion of the project budget supplemented by Surface Transportation Block Grant (STBG) funding. The intent of this project is to help the City refine the scope of improvements within the project boundary and develop a preferred alternative for final design based on projected traffic volume and existing opportunities and constraints.

B. Overview

The City is seeking a conceptual design and cost estimate for an 83rd Avenue Corridor (10th to 12th Street) Improvement Project. This conceptual plan is sought to address the need to meet future projected traffic flows and will include modifications to the intersections and corridor geometrics. Continued development in the 10th Street/83rd Avenue area has warranted the need to plan for upgrading this segment of roadway in conformance with the Transportation Plan to a four lane arterial with medians, turn lanes, and multi-modal facilities. Right-of-way over much of this roadway has been obtained from development.

83rd Avenue has been identified as a major arterial by the Greeley 2035 Comprehensive Transportation Plan. This project will widen 83rd Avenue to a major arterial roadway with turn lanes from 12th Street to Highway 34 (10th Street). Design is scheduled to commence in 2021 with ROW acquisition in 2022 and construction to follow in 2024.

The 83rd Avenue is an existing 2-lane north-south roadway with a posted speed of 40 mph adjacent to the project site. 83rd Avenue is classified as an arterial in the Greeley Transportation Plan. 10th Street (US 34 Business) is a 4-lane east-west arterial roadway with a posted speed of 65 mph adjacent to the project site. 12th Street is a collector street adjacent to the south portion of the project site with a posted speed of 30 mph. Existing lane configurations at the 10th Street/83rd Avenue and the 12th Street/83rd Avenue are shown on the aerial diagrams below.

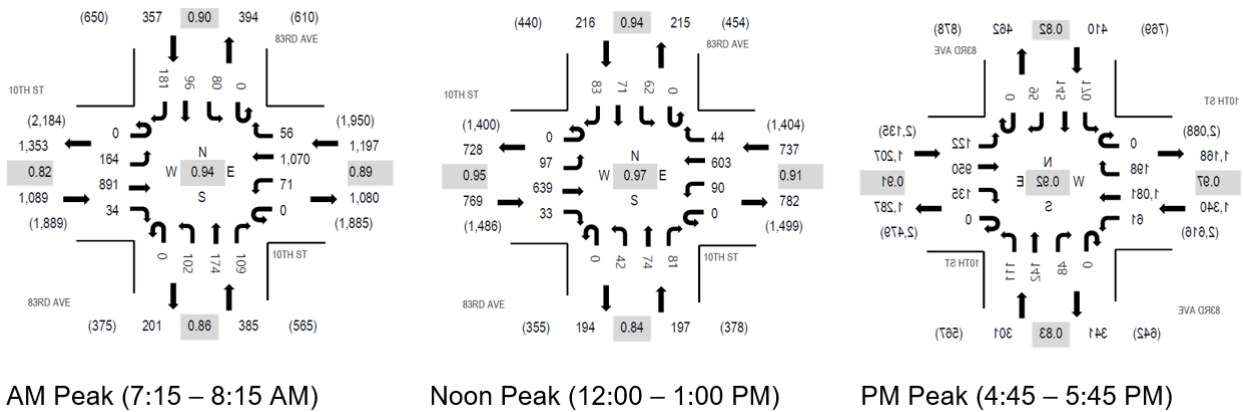

10th Street/83rd Avenue Intersection

12th Street/83rd Avenue Intersection

Recent traffic counts (2019) show that the 10th Street/83rd Avenue intersection has higher traffic volumes during the peak morning and afternoon periods on the 10th Street and 83rd Avenue approaches. According to recent intersection movement counts collected during peak hours, east-west through volumes on 10th Street reach 1,100 vehicles per hour on the respective approaches. Also, the 10th Avenue west approach has heavier eastbound left-turning movements that reach 200 vehicles per hour during the peak hours. Shown below are the turning movement volumes during the peak hours collected in 2019.

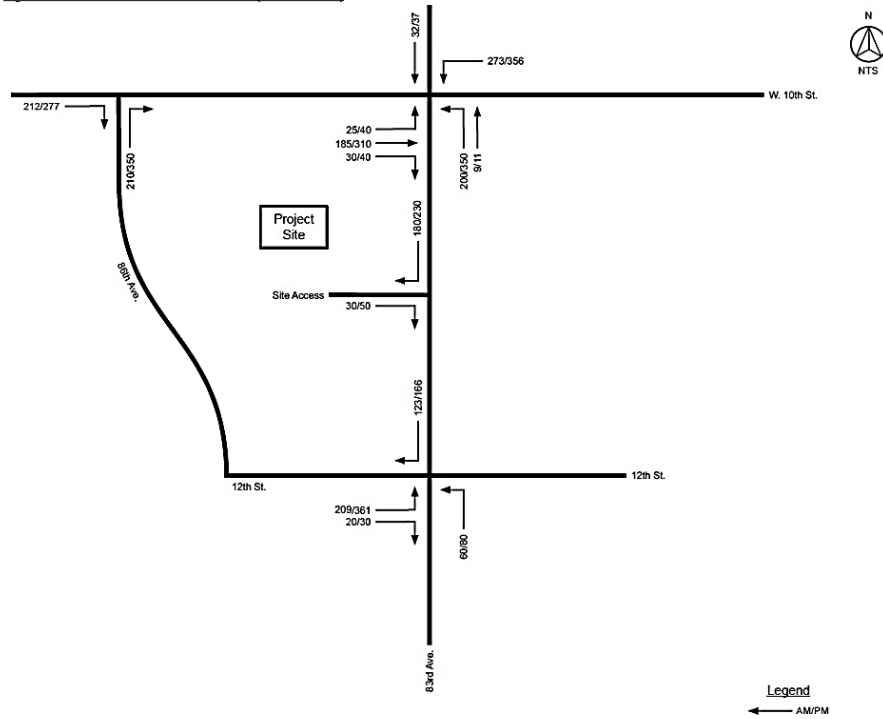

Continued development in this 10th Street/83rd Avenue area has warranted the need to plan for modifying this 83rd Avenue corridor. Recent traffic impact studies for a proposed Two Rivers Marketplace development show a trip generation of 22,000 daily trips that will significantly increase traffic volume along this corridor. This proposed commercial development is shown below and is located at the southwest quadrant of the 10th Street/83rd Avenue intersection.

According to this development's Traffic Impact Study (TIS) recommendations, a new traffic signal would be warranted at the 12th Street/83rd Avenue intersection. Also, dual westbound and eastbound left-turn lanes would be justified at W. 10th Street/83rd Avenue with dual northbound and southbound

receiving lanes at the intersection. Provided on the next page is the TIS's site generation for this development.

Figure 7: Site Generated Peak Hour Traffic (Full Build-Out)

Improvements are also needed to address predominant crash patterns and contributing factors. The predominant crash types over a 5 year period include approach turns (34%) rear-ends (37%) and broadsides (14%). Approach turn crashes primarily involve eastbound and northbound left-turning vehicles. Broadside crashes primarily involve southbound vehicles hit by westbound vehicles, and rear-ends primarily occur among eastbound vehicles. Contributing factors for these crashes may include higher speeds, signal visibility, higher traffic volumes, and sight distance. Staff has identified sight distance as a contributing factor, which may warrant realignment to improve horizontal sight distance for northbound and southbound left-turning vehicles.

The conceptual design must also include considerations for alternative modes including, bikes, pedestrians and transit. A trail is planned along 83rd Ave that would extend from the Sheepdraw Trail to the south and ultimately connect with the Poudre Trail to the north within the Xcel utility corridor. Considerations for the trail must be included in the design. Future transit along 10th St must also be considered in ultimate design options.

C. Goals

- Produce conceptual design documents with the intent of defining scope for the project considering the city's project budget, future planning, and other considerations for the 83rd Avenue Corridor (10th -12th St) Project. The conceptual design documents will be used to define the scope of the project as it enters the final design phase.
- Identify constraints and challenges that could impact the success of the project.
- Address multi-modal needs (i.e. transit, bike, pedestrian, etc.)
- Conduct a thorough traffic analysis that accounts for all surrounding development and projects capacity needs.
- Develop design options based on the traffic analysis and test feasibility.
- Coordinate with CDOT, Weld County, Water and Sewer, Natural Areas and Trails Division, the City of Greeley Water and Sewer Division (proposed 30" non-pot water main), Xcel and other stakeholders throughout the design process and seek input to develop a preferred alternative.

SECTION II. STATEMENT OF WORK

A. Scope of Services

Design Analysis

As part of this conceptual plan project, the consultant should undertake the following tasks including: The planned intersection geometrics will include widening the 83rd Avenue corridor to a four-lane facility with north/south dual left-turn lanes at the 10th Street/83rd Avenue intersection. The consultant may include other design features such as accommodating multi-modal facilities to the benefit of the project. As part of the conceptual plan, the design must consider future widening of the 10th Street approaches to include additional auxiliary and through lanes at each approach to the intersection.

A traffic analysis is required to assess ultimate build-out of the intersection to meet acceptable LOS D for projected 2045 traffic flows. This analysis would include the improvements needed along the Highway 34 Business (10th Street) approaches as well as ones along the 83rd Avenue corridor (10th – 12th Street). Another analysis should be completed for the preferred conceptual design option comparing the benefits with respect to motorist delays, emissions, etc. with the "do nothing" option. This analysis should be completed for the 2025 and 2045 periods.

The conceptual design plan shall include the approximate locations for relocated traffic signal infrastructure in conjunction with the roadway elements such median islands, overhead power lines, existing underground utilities, etc. Cost estimates for the traffic signal installation will be provided by the City.

Pavement rehabilitation should also be considered in the cost estimate for the project. This pavement will be assessed by the City with cost estimates provided. The cost estimate should also include property acquisition required to accommodate the future expansion of this intersection. This includes

a conceptual plan showing the anticipated acquisition for the built-out intersection. Cost estimates for the acquisition will be calculated by each City based on the area.

Coordination with CDOT staff is required for this project. A meeting should be held to discuss the conceptual options as well as the phased approach for the ultimate widening of the intersection to meet acceptable levels of service for 2045 projected flows. Another meeting should be held to discuss the preferred option for this conceptual plan.

Scope of Work

The consultant shall supply conceptual design documents with the intent of defining scope for the project considering the city's project budget, future planning, and other considerations for this 83rd Avenue Corridor (10th -12th St) Project. The conceptual design documents shall be used during the design to outline the consultants understanding of the project and to define the scope of the project.

The Conceptual Design Documents shall include but is not limited to:

- The consultant should conduct a traffic analysis to assess ultimate build-out of the 10th Street and 12th Street intersections to meet acceptable LOS D for projected 2045 traffic flows
- The consultant should address the multi-modal needs for this corridor
- Conceptual Design Development Review Set. The consultant shall create a conceptual design development review set per City of Greeley Standards as outlined in the Design Criteria and Constructions Specifications. This conceptual set shall include but may not be limited to general notes, grading, geometric design, drainage, traffic signal design, striping, and more.
- Quantity and Opinion of Cost. Consultant shall provide a conceptual quantity take off and opinion of cost.
- Constructability Review. The consultant shall perform a constructability review of the conceptual design to identify risk of special areas of interest. Results of the constructability review shall be documented in a formal report and issued with the conceptual review set.

All files must be provided to the City in both electronic and paper copies as needed/established in the workshop. Electronic files (Civil 3-D CAD/ArcMap) shall be given to the City with all the reference files as needed or requested.

 - The MUTCD prepared by the Federal Highway Administration
- Submit preliminary plans and specs to City staff for review and revise as necessary to reflect City staff comments
- Provide an analysis showing benefits of the proposed approach improvements with respect to reducing motorist delays, emissions, etc. for 2025 and 2045 periods as compared to the "do nothing" option.
- Identify utility conflicts and right-of-way / construction easement needs

- Prepare preliminary cost estimate
