**Project Scope of Work
Fire Station #2 and #6 Inspection Services
October 23, 2019**

Project Description:

The City of Greeley is experiencing sustained and significant growth towards the western edge of its boundary. As a result, demand for fire and police department services has dramatically increased in this western area. Additionally, fire and police response times in this area have fallen out of the acceptable range of local and national standards due to increased call volume and excessively long travel distances.

Further, the City has determined that fire station 2 is no longer adequate to meet the needs of the Fire Department. The station is 60 years old and has significant design deficiencies that are no longer suitable to meet operational demands of the Greeley Fire Department. Over the last several years, maintenance of the station has proven to be costly and to adversely affect the ability of fire companies to live in, and respond to emergencies from the station.

A recent survey of the community indicated a high level of support to address the deficiencies of fire and police coverage gaps in the western area of the City, as well as the inadequacies of fire station 2, with new facilities. This support was validated by the recent voter approval of a public safety tax continuation which will be used to fund these projects.

The fire station 2 project will demolish the existing training tower on the current site, construct a new fire station 2 on the same site as the existing fire station 2 and then demolish the existing fire station 2 once the proposed fire station 2 is operational.

The fire station 6 project will construct the proposed fire station 6 on a green field site as well as approximately 800' of minor arterial roadway, as well as connecting the minor arterial roadway in to the existing Promontory Parkway.

The City of Greeley is inviting companies to bid on inspection services for both fire stations generally including:

- Earthwork Observation and Testing
- Reinforcing Steel / Anchor Observations
- Concrete Testing
- Structural Masonry Inspections
- Structural Steel Welded and Bolted Connections
- Hot-Mix Asphalt Testing
- Engineering, Management and Reporting

The City request bids for inspection and testing services as outlined in this Invitation to Bid and attached Bid Tabs. The following scope of work reports an anticipated number of tests based on projects of similar size and scope. The bidder shall supply a bid based on the anticipated types and number of tests and shall also include a Fee Schedule per test in the event additional tests are required. Work associated

with this scope of work shall be time and material for actual testing performed per the supplied fee schedule.

Each fire station project is considered a separate project; therefore, an independent bid shall be submitted for fire station 2 and for fire station 6. The 20th St extension inspection services are considered a portion of the fire station 6 project as the site is immediately adjacent to the fire station 6 project. Award of the inspection services shall be based on the combined bids for both fire stations 2 and 6.

All inspection services shall be scheduled by the contractor, Golden Triangle Construction, and the bidder agrees to adhere to the project schedules as attached as part of this Invitation to Bid.

Codes, Design Criteria, Specifications and Standards:

All work performed under this scope of work shall be conducted according to the plans and specifications of the project included with this Request for Bid. Testing shall be performed by an accredited testing firm certified to perform the testing herein.

Compliance Report

The inspection company will author and submit a compliance report for each fire station project certifying that the project was constructed per code or document deficiencies in the construction where the construction deviated from code. The compliance report will be submitted to the City within 30 days of substantial completion of the project.
