BID # FD20-11-153

DUE DECEMBER 1, 2020 BEFORE 2:00 P.M.

The Office of the Purchasing Manager is a service division established to build effective partnerships through efficient and responsive procurement processes to obtain high quality goods and services for the best value.

#### I. INTRODUCTION

The City of Greeley seeks proposals from qualified firms to (a) research and test the public opinion of a number of potential ballot issues that the City Council may consider for inclusion on the November 2021 ballot; and (b) provide communications, public outreach and education relative to the tax renewal initiative and any other potential ballot initiative(s).

The November 2021 ballot issues currently under consideration by the City Council are renewals of the following existing sales tax measures:

Keep Greeley Moving	Expires December 2022
11000 010010 1110 11110	Empires Bettimetr 2022

#### II. PROJECT DESCRIPTION & SCOPE OF WORK

**PROJECT DESCRIPTIONS** 

Keep Greeley Moving Tax Renewal

Greeley voters first approved the Keep Greeley Moving (KGM) tax in 2015 for a period of a seven-years. The 0.65% sales tax (food exempt) focused on street related improvements and repairs. Theis tax is currently set to expire in 2022. Over the last three years, the KGM tax has resulted in the following investments:

AREA	AMOUNT
Concrete repairs (including 38,631 linear feet of sidewalks)	\$3.2 Million
Seal coat 49.63 miles of roadway	\$3.3 Million
Patching of 54,298 square yards of roadway	\$3.4 Million
Overlay of 29.76 miles of roadway	\$16.9 Million
Applied 794,296 pounds of crack seal	\$1.3 Million
Roadway expansion work (including 20 <sup>th</sup> Street and 71 <sup>st</sup>	\$13 Million
Avenue)	
Total Revenue Invested	\$41.1 Million

The funding and support of the taxpayers of KGM was a significant step in making progress in the City's ability to enhance its street improvements and repairs. Without this voter-approved funding, the investments highlighted above would not have been possible. During the first four years of KGM, the funding has helped reduce the backlog of overlay projects from 85 miles to 52 miles, and has helped improve the road system's average Pavement Quality Index (PQI) rating from 61 to 65. While the funding has enabled progress, a significant backlog of road maintenance needs remains for the City's 397 miles of roads. Additionally, there are over \$40 million in curb, gutter and sidewalk needs that still exist today.

The KGM funding was not intended to and has not been able to fully address the backlog of improvement and repair projects due in part to construction cost inflation and annual asset growth similar to the Food Tax. With an annual average growth of 3.0%, offset by an annual average asset growth of 3.0%, and further compounded by an annual average construction cost inflation factor of 2.9%, the City is losing ground every year.

Based on the current KGM revenue collection- supplemented by an annual transfer of \$3.6 million to the Road Development fund for road widening projects and an annual transfer from the Food Tax of \$2.7 million for pavement maintenance - an average of \$11.5 million is available each year for investment in street repair. When compared to an annual need of \$14.0 million, there is an annual shortfall of \$2.85 million. If renewed, the KGM is estimated to generate approximately \$80.5 Million in revenue over seven-years for street improvements and repair.

# CONTRACT ADDENDUM COVID-19 RISK MITIGATION

# 1) Implementation of Basic Infection Prevention Measures:

- a. All Contractors and Subcontractors shall develop procedures for employees to report when they are sick or experiencing symptoms of COVID-19. At a minimum, these procedures will include temperature monitoring and symptom assessment as set forth below.
  - 1) Contractors are required to insure that their employees and all of their subcontractor's employees conduct daily self-assessments for potential presence of COVID-19 upon their arrival at the worksite. The assessment must be carried out regardless of whether the employee believes he/she has been exposed to COVID-19.
  - 2) Employees must ask themselves the following questions:
    - Do I have a runny nose, sneezing, cough, sore throat, diarrhea, nausea or vomiting (not related to other health conditions such as known allergies or chronic illness)?
    - Am I having trouble breathing in a manner that is out of the ordinary for me?
    - Do I have a sore throat?
    - Have I experienced an exposure or have I been in close contact with anyone experiencing the symptoms described above or who is suspected to have/diagnosed with COVID-19?
  - 3) Contractors must insure that their employees and all of their subcontractor's employees have their temperature taken prior to or upon their arrival at the worksite.
    - Taking temperatures is not done instead of the other health and hygiene requirements that have been set forth by the local, state and national authorities. Temperature taking is done in addition to those requirements.
  - 4) Any symptoms identified by the Daily Self-Assessment or a confirmed temperature of 100.4° F or higher must result in the affected employee being sent home. The Contractor must follow federal, state, and local guidance to determine when the employee can return to the worksite.
    - The Contractor shall immediately notify the Project Manager about any employees that are sent home due to temperature or COVID-19 symptoms.
- b. All personnel must comply with social distancing on construction worksites.
  - 1) Reduce size of work crews: Teams should reduce the number of people in each work crew to the minimum number of people possible to perform the task safely, even

if the reduction of crew size means the job takes longer.

- 2) Minimize interaction between work teams: Even groups within the same project should avoid interaction across groups, to minimize possible viral spread if one worker contracts COVID-19. Approaches to avoiding contact between groups may include staggered shifts, compressed work weeks where different teams work different days, and maximizing geographic distance between different teams working on the same project.
- 3) Avoid contact with visitors: Visitors outside the typical work crew should avoid interaction with the team wherever possible. For example, if an inspector or materials delivery needs to enter the site, they should alert the work team (e.g. by honking the horn of their vehicle twice or through another established communication means) so that the work team can vacate the site while the external parties are present.
- A) Maintain a 6 foot distance between employees wherever possible: Construction teams should make every effort to limit activities that cannot be performed within 6 feet of distance between COVID-19: MULTI-INDUSTRY CONSTRUCTION GUIDANCE 040120 1 workers. However, some core construction activities may require some proximity to complete (e.g., concrete pours, utility potholing, work in cranes, drainage pipe construction, among others). In these cases, construction crews must employ other aggressive measures to limit contact. Examples include requiring employees to face away from each other, the use of supplemental Personal Protection Equipment (PPE) like face shields or respirators, minimizing the number of people on a team, and retaining consistency within work teams to limit contact with parties external to that team.
- 5) Office work should be done remotely, whenever possible: Office functions associated with a project (e.g. accounting or records) should be done from home to the maximum extent practicable.
- 6) In-person meetings should be avoided: Office meetings and consultations should take place virtually, with participants working from home or their work truck, whenever possible. If an in-person meeting is absolutely necessary, that must be limited to fewer than ten people, and participants must maintain 6 foot distance at all times during the meetings. All surfaces should be wiped down before and after the meeting, and hand washing should also occur before and after the meeting.
- 7) Workers must not congregate during breaks: Construction workers should not congregate for lunch or other breaks.
- 8) Activity specific work plans: Contractors should consider all job activities and review how they can be accomplished using necessary social distancing and sanitation protocols.
- c. General Recommendations for Routine Cleaning and Disinfection on the Jobsite:
  - 1) Contractors and subcontractors should use disposable wipes to wipe down used communal items like tools, equipment and job-boxes.

- 2) Make wipes and disinfectant available in common areas and "shared" equipment to allow workers to clean equipment before and after use.
- 3) Before using Aerosol Disinfectants on Fall Protection Harnesses, Connectors or Rigging, consult the manufacturer recommendations for cleaning since these can deteriorate the fibers of the material.
- 4) Practice routine cleaning of frequently touched surfaces (for example: tables, workstations, doorknobs, handles, etc.) with household cleaners and EPA-registered disinfectants that are appropriate for the surface, following label instructions. Labels contain instructions for safe and effective use of the cleaning product, including precautions you should take when applying the product, such as wearing gloves and making sure you have good ventilation during use of the product.
- d. General Recommendations on How to Clean and Disinfect Surfaces:
  - 1) Wear disposable gloves when cleaning and disinfecting surfaces. Gloves should be discarded after each cleaning. If reusable gloves are used, those gloves should be dedicated for cleaning and disinfection of surfaces for COVID-19 and should not be used for other purposes. Consult the manufacturer's instructions for cleaning and disinfection products used. Clean hands immediately after gloves are removed.
  - 2) If surfaces are dirty, they should be cleaned using a detergent or soap and water prior to disinfection.
  - 3) For disinfection, diluted household bleach solutions, alcohol solutions with at least 70% alcohol, and most common EPA-registered household disinfectants should be effective.
  - 4) Diluted household bleach solutions can be used if appropriate for the surface. Follow manufacturer's instructions for application and proper ventilation. Check to ensure the product is not past its expiration date. Never mix household bleach with ammonia or any other cleanser. Unexpired household bleach will be effective against coronaviruses when properly diluted. Prepare a bleach solution by mixing:
    - 5 tablespoons (1/3rd cup) bleach per gallon of water or
    - 4 teaspoons bleach per quart of water
  - 5) A list of CDC-approved disinfectants against viruses (including COVID-19 virus), see: https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2 Follow the manufacturer's instructions for all cleaning and disinfection products (e.g., concentration, application method and contact time, etc.).
  - 6) For soft (porous) surfaces such as carpeted floor and rugs, remove visible contamination, if present, and clean with appropriate cleaners indicated for use on these surfaces.

- e. Detailed Recommendations for Cleaning and Disinfecting on the Jobsite:
  - 1) Sanitation Units (Portable Toilets)
    - Evaluate and provide additional restrooms (with hand sanitizer) as needed.
    - Frequently or as needed, clean the surfaces that are dirty. They should be cleaned using a detergent or soap and water prior to disinfection.
    - Use an Aerosol Disinfectant or diluted household bleach solutions (mentioned in the section above) to disinfect the commonly used items on the unit (handles, locks, toilet seat, etc.).
    - With the promotion of frequent handwashing, it is more likely that the
      handwashing stations will need frequently or as needed refill of the
      water tank, soap/hand sanitizer dispensers and paper towel dispenser.
      It is recommended to add a morning and afternoon inspection of the
      units to guarantee they are serviceable.
  - 2) Project Site Offices, Conference Rooms, Break Areas and Other Common Areas:
    - Frequently or as needed, clean the surfaces that are dirty. They should be cleaned using a detergent or soap and water prior to disinfection.
    - Wipe down tables and chairs with household cleaners or disinfectant wipes that are appropriate for the surface, following label instructions.
    - Floor should be swept and disinfected with a diluted household bleach solution.
    - As there is no designated lunch break area on for field personnel, it is recommended that lunch breaks be taken in personal vehicles or segregated around the site. Please do not congregate in tool trailers or connex boxes. This will help maintain social distancing of 6 feet.
  - 3) Jobsite Entrances, Gates and Doors:
    - Routine cleaning of the pull handles, locks and/or panic devices on doors by wiping them down with household cleaners or disinfectant wipes that are appropriate for the surface, following label instructions.
  - 4) Operators of Light and Heavy Equipment (Forklifts, Scissor Lifts, Excavators, Loaders, Scrapers, etc.)
    - Prior to and after use, wipe down controls, seats, handrails or other frequently touched surfaces with household cleaners or disinfectant wipes that are appropriate for the surface, following label instructions.
  - 5) Hand Hygiene and other Preventive Measures:
    - Employees should clean hands often, including immediately after removing gloves and after contact with any other person, by washing hands with soap and water for at least 20 seconds. If soap and water are

not available and hands are not visibly dirty, an alcohol-based hand sanitizer that contains at least 60% alcohol may be used. However, if hands are visibly dirty, always wash hands with soap and water.

 Employees should follow normal preventive actions while at work and home, including recommended hand hygiene and avoiding touching eyes, nose, or mouth with unwashed hands.

- b. Contractors will train employees on the updated safety policy.
- c. Contractors will ensure that all subcontractors are aware of and follow Contractors updated safety policy.

# 3. City of Greeley Project Sites Controls:

- a. Site Isolation:
  - 1) All Contractors and Subcontractor shall minimize or eliminate activities within City of Greeley facilities that require operations by City Staff. If City Staff and Contractor are required to be located in the same facilities, the Contractor shall coordinate with the Project Manager to minimize contact and reduce exposure.
  - 2) All Contractors and Subcontractors shall eliminate face to face meetings to minimize possible of exposure. All questions, concerns, and construction related questions shall be address through phone communications.
  - 3) Contractors shall notify the Project Manager prior to entering City facilities and provide information on work to be done and areas they will be in. Contractors shall not enter any administrative or occupied facilities without prior approval from the Project Manager.
  - 4) If any employee of a Contractor or Subcontractor enter the site while sick, they will be immediately asked to leave. Contractors will not be compensated for this lost time.
- b. Personal Protective Equipment (PPE):
  - 1) All Contractors and Subcontractors shall wear non-medical face coverings while working on City of Greeley job sites.
  - 2) Contractors shall require the use of additional PPE as recommended by federal, state and local authorities.

# 4) City of Greeley contract controls:

- a. To remain ahead of identified concerns, Contractors must reach out to their subcontractors and suppliers to ascertain potential sources of delay to ensure they give the proper notices to their owners.
- b. Contractors must promptly notify the Project Manager of potential delays.
- c. If a Contractor determines that a project or project phase must be shut down due to the COVID-19 pandemic, the Contractor shall immediately contact the Project Manager and submit a change order request.
  - 1) Contractors must insure that the project site is left in a safe condition. Contractor shall insure periodic inspection of the project site.
  - 2) Traffic control devices must continue to be inspected and maintained, so it is a best practice to minimize their need and use when a project is temporarily inactive.
- d. Contractor will insure compliance with all CDC and OSHA requirements.
- e. Contractor agrees that this addendum may be supplemented as additional guidance is received from federal, state and local authorities.
