Attached are the June 2019 amendments to the Storm Drainage Design Criteria and Construction Specifications manual. The amendments contained herein are effective immediately.

Please update amended pages in your manual, amended sections have “rev June 2019” at the bottom of the page. The changes include:

- Redaction of references and details pertaining to corrugated metal pipe (CMP) and aluminized steel pipe (ASP) in sections 6, 9, and in the drawings section.
- Addition of the updated manhole cover and manhole rings in the drawings section.
- Redaction of erosion control structures in detail 12-1 of the drawings section, these drawings were replaced with references to UDFCD vol. 3.
- Removed CAP references in section 11.
- Added requirements in section 12 for stormwater quality for post-construction per the City’s MS4 permit.
- Added SWMP review requirements for new development in section 12 and section 13.
- In section 9, table 9-1 (continued), references to CMP removed.
