NATURALIZED GRASS MIX (UNMOWED)

MIXED PRAIRIE GRASSES (UNMOWED)

Figure 12: Priorities for Existing Parks

What do you think should be a priority to address in Greeley's existing parks? (Keypad Polling Session #1)

Did you know Woodbriar Park consumed 3,530,000 gallons of water for irrigation in 2016?

That's enough water to provide 107 households with water for 1 year!!

...or you could fill 5 Olympic-sized swimming pools!!!

OR it would be like leaving your faucet running for

13.4 years!!
