SECTION I. BACKGROUND, OVERVIEW, AND GOALS

A. Background

The City of Greeley is a home rule municipality with a council-manager form of government and is the county seat and the most populous municipality of Weld County, Colorado. Greeley is in northern Colorado and is situated 52 miles north-northeast of the Colorado State Capitol in Denver. According to the U.S. Census Bureau, the population of the city is roughly 111,000 which makes it the 12th-most populous city in Colorado. The City has an annual budget of ~\$490M with a fiscal year that starts Jan 1st, and employees over 1100 employees. Greeley is a major city of the Front Range Urban Corridor and home to the University of Northern Colorado which is a public baccalaureate and graduate research university with approximately 12,000 students and six colleges as well as Aims Community College, which has served the community since 1967.

B. Overview

The City of Greeley, Water and Sewer Department, (City) needs the services of a qualified irrigation company to install an irrigation system according to construction drawings, details, and specifications for the designed irrigation system. Installation work is for the City's 0.75 acre Xeriscape Demonstration Garden located at 2503 Reservoir Road, Greeley, CO 80631. Installation work will be based off the current point of connection for the existing mainline and an irrigation design that will be provided.

The 0.75 acre Xeriscape Demonstration Garden was created in 1997-1999 to showcase a mix of water-wise perennials, annuals, ornamental grasses, bulbs, trees and shrubs. The goal of the Xeriscape Demonstration Garden is to be a local attraction to the area and the surrounding community. Key elements for the garden include demonstration of plant materials that are easy to maintain and resilient, educational opportunities to teach others about landscapes and a local resource highlighting water-wise landscape. In addition to plant material, the garden houses two art sculptures, a fountain, sitting areas, bee hotels and a community little library box. Plant material has evolved with various staff members changing and contributing to random mini-demonstration areas. Typically, budget allows only one seasonal position to maintain this garden and the irrigation system.

C. Goals

The goals for this project are get the irrigation system completed this year including the mainlines, laterals, valves, controller and wiring. Develop a phased plan to include options from Scope of work below 3. a-f.
