Uses For Recycled Aggregate Materials

Reusing material is also beneficial to the environment in reducing landfill accumulation and can extend the life of other aggregates and raw material sources. Recycled material is a great resource in alley and road maintenance for City projects as well as for private sector projects. This program provides recycled materials for sale to the public, which can be used for road resurfacing.

Products – Now Selling

Below is a list of products we offer. All products are subject to availability. Prices do not include sales tax and there is a \$15 minimum on all orders. No tax is charged if tax exempt and if purchased for re-sale.

Now Accepting Disposable Materials

The program also accepts materials that meet the following specifications. Please consider diverting any of these materials from the landfill and bring them to us. We reserve the right to decline loads. If you dump an unacceptable load, you will be charged a dump fee. Trash, mixed loads or excessive dirt will NOT be accepted. We cannot take any type of material from building demolition projects. We will accept:

- Asphalt (clean, broken or milled asphalt)
- Concrete (no rebar, or other contaminants)
