

WATER & SEWER

Contractor Grade Controllers

Contractors, contractor supply houses, brick and mortar or online are places where these controllers are available.

- Any [Rain Bird controllers](#) with the [Lync WiFi Module](#) and [WR2 Wireless Rain Sensor](#) installed.
- Any [Hunter controller](#) with the [Solar Sync sensor](#) installed.
- The [Toro Evolution](#).
- Any [Irritrol controllers](#) with the [Climate Logic sensor](#) installed.
- The [Weathermatic SmartLine](#).

These are central controlled commercial-grade controllers that utilize weather-based data to adjust watering schedules.

The City of Greeley provides rebates on contractor-grade controllers. We will pay for 50 percent of the cost of the controller, up to \$300. You may need an irrigation professional to assist you in installation – but that cost is not included in the rebate.
