

Contractor Grade Smart Irrigation Controllers

The City of Greeley Water Conservation program provides rebates on contractor-grade smart irrigation controllers. The rebate is for 50% of the cost of the controller and necessary accessories, up to \$300. These are centrally controlled, commercial-grade controllers that utilize weather-based data to adjust watering schedules. These controllers are available through contractors, contractor supply houses, brick-and-mortar stores, or online. You may need an irrigation professional to assist you in installation, but that cost is not included in the rebate.

- Any contractor-grade <u>Rain Bird controller</u> with the <u>LNK WiFi Module</u> AND <u>WR2 Wireless RainSensor</u>
- Any contractor-grade <u>Hunter controller</u> with the <u>Solar Sync sensor</u>
- <u>Toro Evolution</u> with <u>Smart Connect Wireless Weather Sensor</u>
- <u>Weathermatic SmartLine</u>
- Any Irritrol controller compatible with and including the Climate Logic sensor
