

Retail Grade Irrigation Controllers

The City of Greeley does not provide rebates on retail grade controllers because they are not water efficient. Retail grade controllers are typically found online or at retail stores. This includes but is not limited to controllers from:

- Homeowner's [Rain Bird](#)
- [Orbit](#)
- [B-hyve](#)
- [Rachio](#)
- [BlueSpray](#)
- [Rainmachine](#)
- [Scotts](#)

The City of Greeley will provide rebates for contractor-grade irrigation Smart Controllers (also called ET controllers) as these ensure irrigation works in sync with weather and optimizes sprinkler run times. Because smart controllers can be more efficient than traditional, time-based irrigation controllers, they often reduce use by at least 10%, saving both money and water. Visit www.greeleygov.com/rebates for more information.
